Projects

ResumeScanning Smart ATS , MERN Stack

Developed a full-stack web application using the MERN (MongoDB, Express.js, React, Node.js) stack to automate resume scanning. The application assists employers and HR professionals in shortlisting candidates by analyzing resumes using intelligent algorithms. It supports keyword-based and contextual job matching and offers job recommendations, thereby enhancing the efficiency of the hiring process.

JobFit , MERN Stack

- Built an intelligent Applicant Tracking System (ATS) to automate resume evaluation against job descriptions.
- Designed role-based dashboards for HR (Recruiter) and Candidates with secure authentication.
- Implemented resume parsing from PDF files and skill extraction for accurate matching.
- Developed an ATS scoring mechanism using keyword matching and semantic relevance.
- Enabled HRs to post jobs, manage applications, and track hiring status, while candidates can apply and monitor application progress.
